

Survey Results

Antes de la presentación, ¿te considerabas bien informado sobre cuestiones de seguridad informática?

189 respuestas

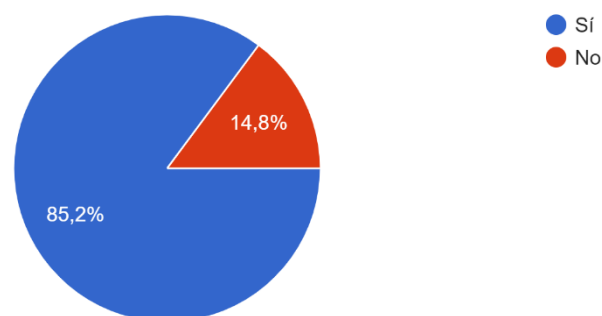

Before the presentation, did you consider yourself well informed about IT security issues?

Result: The graph shows that most respondents answered "Yes," suggesting that although many already felt informed, there was still a portion of people who were not. This indicates a need for cybersecurity training.

¿Te sientes más seguro ahora después de haber participado en la presentación?

189 respuestas

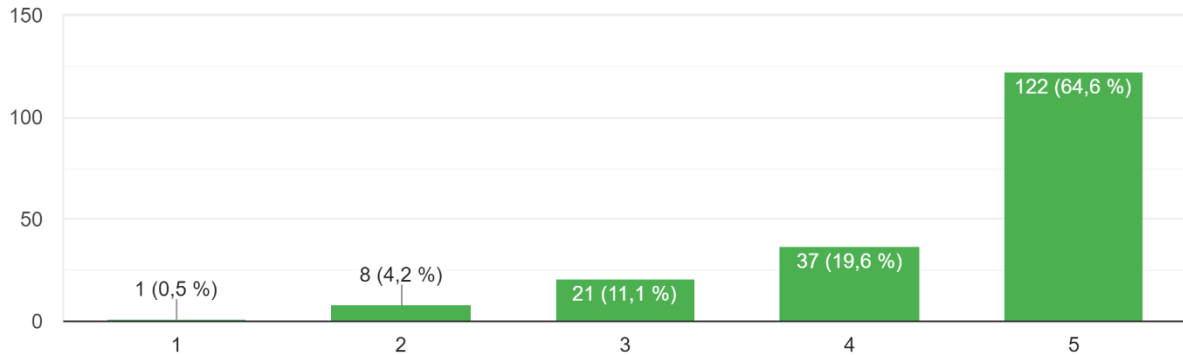

Do you feel more confident now after having participated in the presentation?

Result: Most participants answered "Yes", suggesting that the presentation achieved its goal of improving the perception of safety among attendees.

¿Qué tan fácil fue para ti conectarte a la red de la presentación?

189 respuestas

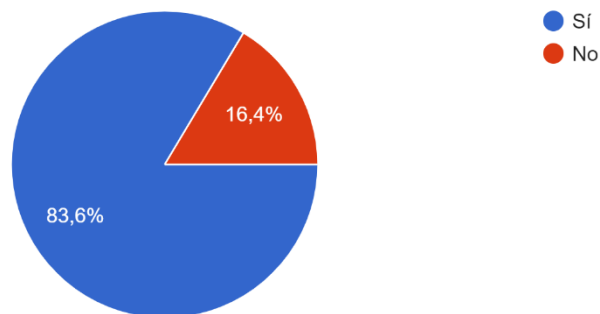

How easy was it for you to connect to the presentation network?

Result: On this linear scale (1-5), most respondents selected "5" (Very Easy), indicating that the connection to the network was smooth for most participants, with few technical drawbacks.

¿Entendiste la importancia de no conectarse a redes desconocidas después de la presentación?

189 respuestas

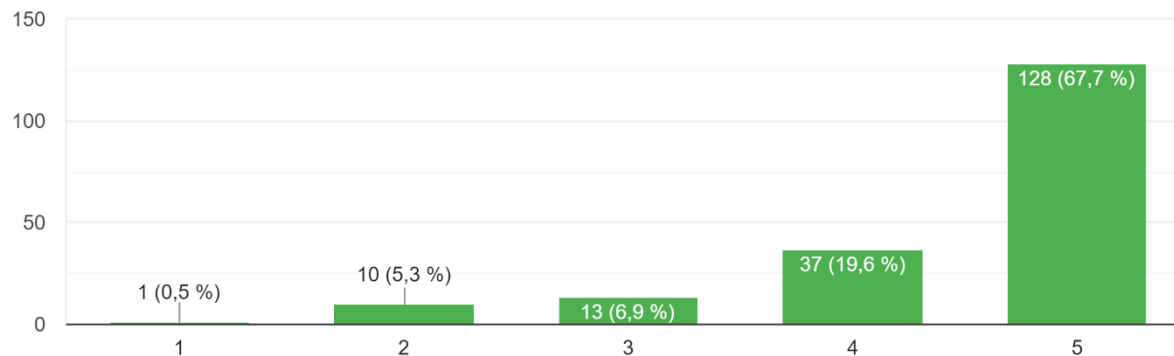

Did you understand the importance of not connecting to unknown networks after the presentation?

Result: The majority answered "Yes," indicating that the presentation was effective in conveying the importance of avoiding unfamiliar networks.

¿Cómo calificarías la claridad de la exposición sobre los riesgos y soluciones de seguridad presentados?

189 respuestas

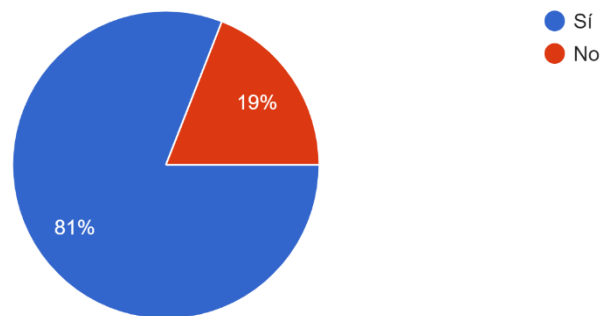

How would you rate the clarity of the exposure on the security risks and solutions presented?

Result: On the clarity scale (1-5), the majority chose "5" (Very clear), reflecting a positive perception of clarity in the explanation of safety issues.

¿Te sorprendió la facilidad con la que se puede llevar a cabo un ataque informático?

189 respuestas

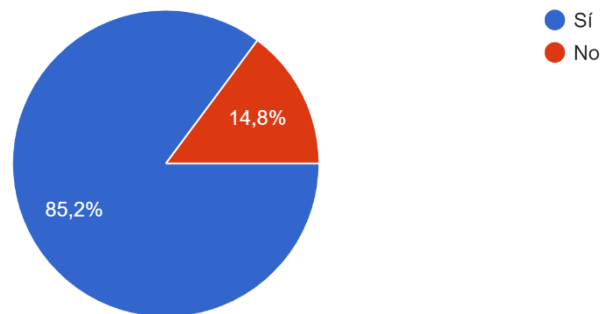

Were you surprised by how easily a computer attack can be carried out?

Result: Most participants answered "Yes," indicating that many were not fully aware of how easily a hack can be performed prior to the presentation.

¿Comprendiste cómo funciona un ataque de phishing después de la explicación y la demostración?

189 respuestas

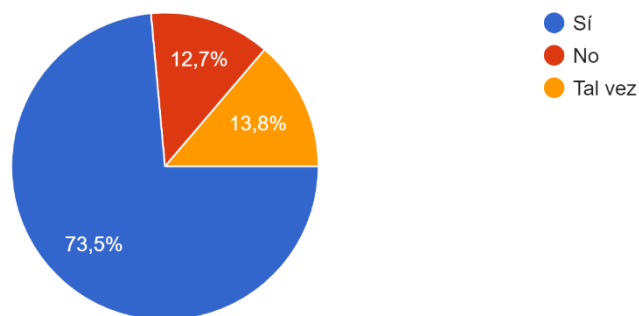

Did you understand how a phishing attack works after the explanation and demonstration?

Result: The vast majority answered "Yes," reflecting that the presentation was effective in educating about phishing.

¿Crees que podrías identificar una página web falsa después de la presentación?

189 respuestas

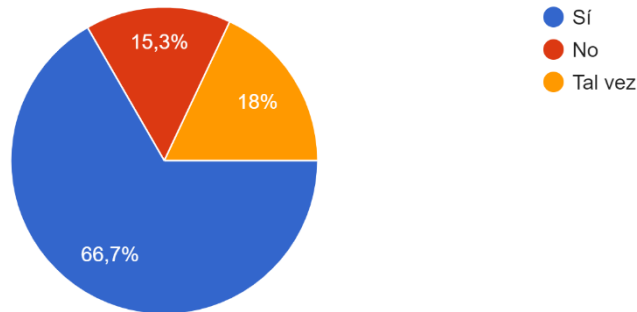

Do you think you could identify a fake website after the presentation?

Result: Although the majority answered "Yes", there are a considerable number of answers in "No" and "Maybe", suggesting that some participants still do not feel completely confident that they can identify a fake web page, highlighting an area for improvement.

¿Te resultó útil la demostración de los ataques de descubrimiento de contraseña?

189 respuestas

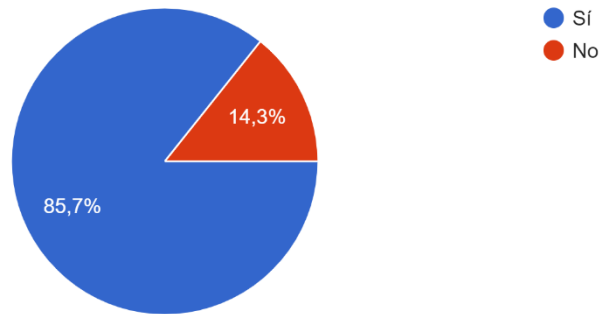

Was the password discovery attack demo helpful?

Result: Most answered "Yes," indicating that participants found value in the practical demonstration of brute force attacks.

¿Te sorprendió el tiempo que puede llevar romper una contraseña usando técnicas de fuerza bruta?

189 respuestas

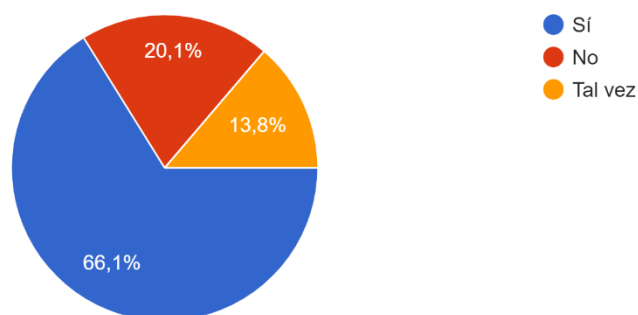

Were you surprised by how long it can take to break a password using brute force techniques?

Result: The majority answered "Yes", showing that many people were not aware of the time required for these techniques prior to the presentation.

¿Te sientes más consciente de los riesgos al prestar dispositivos electrónicos después de la presentación?

189 respuestas

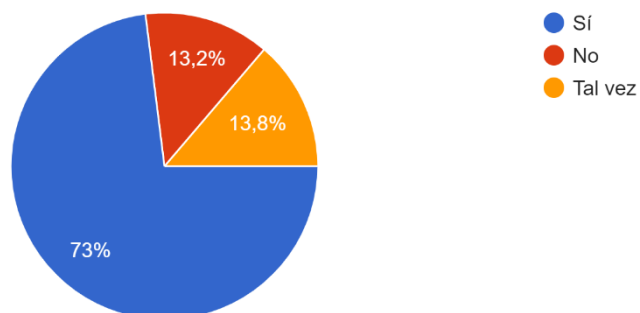

Do you feel more aware of the risks when lending electronic devices after the presentation?

Result: Many respondents answered "Yes," indicating an increase in awareness of the risks of lending electronic devices.

¿Recomendarías esta presentación a otras personas?

189 respuestas

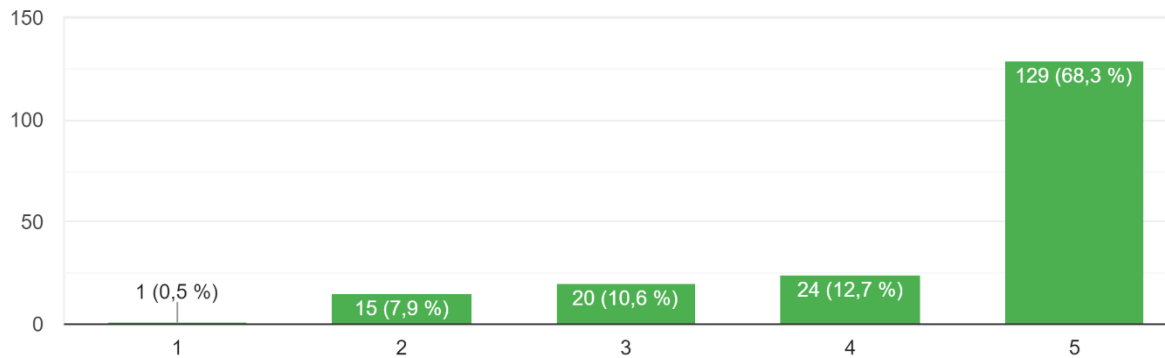

Would you recommend this presentation to others?

Outcome: Most said "Yes," suggesting that participants found the presentation valuable and would be willing to recommend it to others.

¿Qué tan preocupado estás por tu seguridad en línea después de la presentación?

189 respuestas

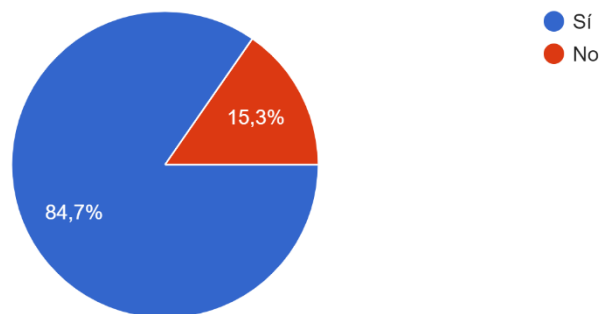

How worried are you about your online safety after the presentation?

Result: On this scale (1-5), the majority selected "5" (Very concerned), indicating that the presentation significantly increased online safety concerns among attendees.

¿Te gustaría aprender más sobre cómo protegerte en línea después de la presentación?

189 respuestas

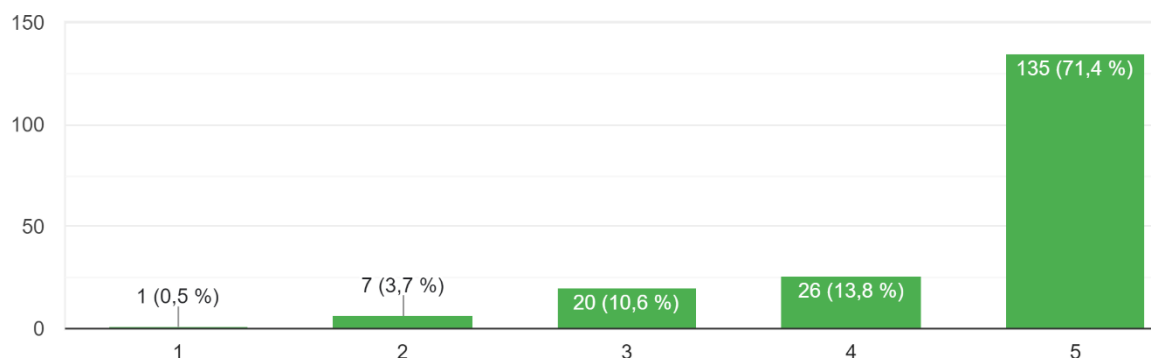

Would you like to learn more about how to protect yourself online after the presentation?

Result: The majority said "Yes," which shows a high interest in continuing to learn about online safety, which may open opportunities for further training.

¿Qué tan relevante crees que es el tema de la ciberseguridad en la actualidad?

189 respuestas

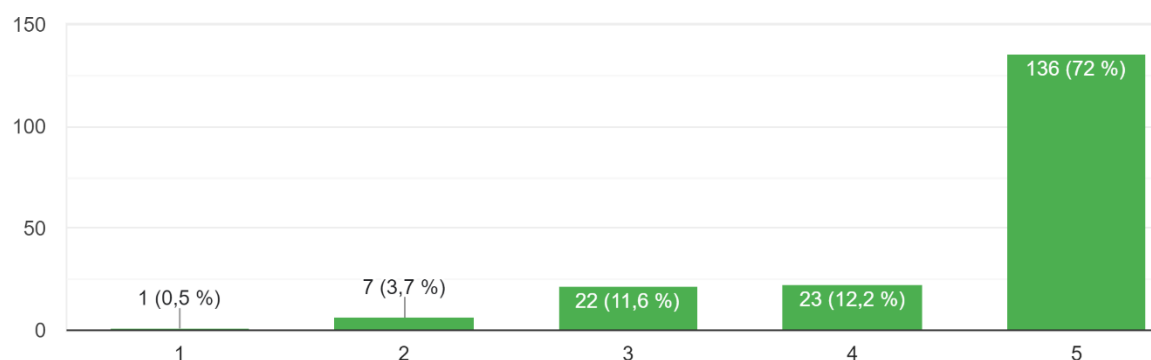

How relevant do you think the topic of cybersecurity is today?

Result: The majority selected "5" (Very relevant), which reinforces the perception that cybersecurity is a topic of great relevance today.

¿Cómo calificarías el nivel de interactividad de la presentación?

189 respuestas

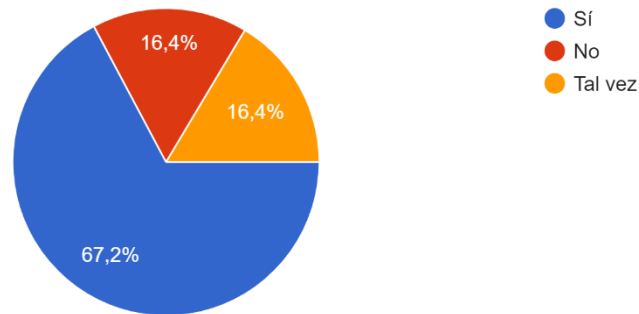

How would you rate the level of interactivity of the presentation?

Result: The majority selected "5" (Very interactive), reflecting a positive perception of the interactive dynamics of the presentation.

¿Consideras que este tipo de presentaciones deberían incluirse en el currículo escolar regular?

189 respuestas

Do you think that this type of presentation should be included in the regular school curriculum?

Result: The majority answered "Yes", suggesting that respondents strongly believe in the need to include cybersecurity as part of the school curriculum.

Overall conclusion

The presentation has been perceived very positively, with most participants reporting an increase in confidence, understanding and concern about cybersecurity. Attendees also highly valued the interactivity and clarity of the exhibition and showed interest in learning more about how to protect themselves online. However, there is a slight uncertainty in some respects, such as the ability to identify fake websites, which could be an area to reinforce in future training.

Finally, it should be noted that the **189 participants** represent a significant portion of the sample, but some were unable to participate due to lack of access to devices such as smartphones, underscoring the importance of addressing the digital divide when implementing educational programs.
